

SOLID FEEDER - RB01

CODE 68408

Solid feeder, semi-automatic, compatible with the RB01 forming machine. It has a pneumatic circuit that promotes product release, providing uniformity, productivity, savings and operational safety for your business.

Transportation and logistics info:

to inform

Electrical data:

Electrical consumption	Total currente	Plug
300 W	1,5 A	Standard 10A socket

Products:

Equipment developed for dosing sausages with a quality standard, without variations in length and straightness and with a maximum diameter of 24 mm and a maximum length of 130 mm. **Unstandardized sausages may compromise the functioning of the equipment.**

Motorization:	100 kgF hybrid stepper motor.
Productive capacity:	Maximum de 1,200 products/ hour
Accessories parts	<div><div><p>Sausage feeder adapter code 68407</p></div><div><p>dough nozzle M253 Ø34 mm code 71012</p></div><div><p>Sausage nozzle of dosing disc Ø26 mm code 70275</p></div></div>
Compatibility with forming machine:	<p>Compatible with the RB01 Forming Machine For existing equipment:</p> <p>1) It will be necessary to check the machine model and its compatibility with the SOLID PRODUCT DISPENSER. The trainer needs to have a PLC (Programmable Logic Controller).</p> <p>2) Installation of the Doser needs to be carried out at the MCI Factory. Deadlines and costs must be checked with Technical Assistance.</p>
Need for air compressor:	<p>Working pressure: 5 bar (0.5 MPa).</p> <p>Air consumption: 179 l/minute or 6 feet/minute</p>
