Description:

11/27/2024

The RBE01 breading machine or coating machine has an output of 18.000 pieces per our put to 20g, and a total yield of 360 kg (794 lb) per hour. Its production process is very simple, it must be fed with the binding liquid and the flour of your preference, thus, the conveyor can do the automatic process of breading with agility and efficiency, ensuring that the product is brewed whole, without kneading, damiging or leaving marks on your final product.
